

LNG Bunkering Development Got Support
from National Fund

On June 28th, 2018, a project developed by Sumitomo, Uyeno and YKIP was officially awarded a subsidy by Japanese government to support the LNG bunkering in Tokyo Bay. The trio will form a joint venture to own and operate a LNG bunkering vessel in the area and commence a STS (Ship-to-Ship) operation in 2020.

In pursuit of promoting cleaner marine energy for the future, with little forecast of local demand in sight, YKIP believes that this challenge requires to ally and justifies to receive the governmental aid from national fund. Through tremendous efforts made and progressive initiatives taken by the trio to achieve the prior investment for future such government decision was finally made.
