

Kawasaki Kisen Kaisha, Ltd. beginning their calls at Daikoku C-4 Terminal

Kawasaki Kisen Kaisha, Ltd. ("K" LINE) will be making their very first call at the Daikoku Pier C-4 Container Terminal on Sep. 27, 2016.

"K" LINE has long been one of our valued customers using the container terminals at Jetty A in Honmoku Pier. They will soon be moving to the Daikoku Pier C-4 Container Terminal where they can handle mega-sized container ships as the terminal boasts a larger total area equipped with high-standard gantry cranes and can accommodate deep draft ships.

We are expecting a continuous increase in the use of the C-4 Terminal by a wide variety of customers to enhance the international competitiveness of the Port of Yokohama.
